Fulton County Government

Fulton Health and Wellness Responds to H1N1 Vaccine Recall
Fulton County did not receive recalled lots

The Fulton County Department of Health and Wellness has received notice of the recall of 800,000 doses of certain H1N1 vaccine lots for children. According to the Centers for Disease Control and Prevention specified vaccine lots are being recalled because their potency was found to be too low.

The Department has assessed its vaccine supply and found that it did not receive nor distribute any H1N1 vaccine with the lot numbers listed by the CDC for recall. Some Fulton County residents received the H1N1 vaccine through private providers other than the Fulton County Department of Health and Wellness. Residents who could have received the vaccine from recalled lots should note that the CDC has determined the H1N1 vaccine to be safe and has determined that there is no need to revaccinate persons who have been vaccinated from the affected lots.
